pr thought bubble club

A thought bubble appears above Elmer.
A small day thought bubble. A diagram appears, displaying the
first Explorer's Club location and the water near by.
74 ELMER (V.O.) 74
When the water washed away our
first Explorer's Club.
In the diagram, the water rises to wash away the Explorer's
Club.
75 ELMER (V.O.) 75
So we moved further away from the
water and started a new Club.
In the diagram a second Explorer's Club appears, further away
from the water.
76 ELMER (V.O.) 76
But now the water is close again,
and it washed the NEW club away!
So, could the water have moved?
In the diagram, the water rises and washes away the second
Explorer's Club. The thought bubble disappears.

pr_thought_bubble_tide

pr thought bubble tide

A thought bubble appears above Mr. Rabbit.
ANGLE ON: The thought bubble, where we see a side view of the beach. The ocean is shown rising up and down.

85 MR. RABBIT (CONT'D)
It's called the tide, and it makes
the ocean get higher and lower.
When the ocean tide gets higher,
the water moves up the beach and
when the tide gets lower, the water
moves back down the beach. The tide
is always changing so the water
moves up and down the beach a
couple times every day.
The thought bubble disappears.

■ FX High tide
■ FX Low tide
